ChemoStar Touch

THE SMARTEST ECL & FLUORESCENCE WESTERNBLOT IMAGER

21.5 Inch Capacitive Touchscreen Display

Scientific Grade CCD Camera 6 or 9 MPixel 16Bit

Self-Explanatory Software Workflow CFR21 Part 11 Compatible

f0.80 or f0.95 Fixed Focal Lens

2 x USB, 1 x Network, HDMI for external Monitor optional

Intelligent Door Security System

Drawer for UV- or Blue/Green Transilluminator

Focus on our new compact **chemiluminescence imager** with its optional fluorescence module. Notable features for the laboratory imaging of the future include advanced capabilities like space-saving sturdy all-metal construction of all ChemoStar darkrooms. Interchangeable high-power fluorescence LED Cubes with spectra ranging from UV to NIR. Highest precision in detection of even the weakest signals due to the use of one of four highly sensitive CCD cameras with 6.0 up to 9.2 megapixel. Manual or motorized 25 mm lenses with an extreme light yield of F0.95. Exchangeable UV-, White-, CyanLED- (Blue/Green) and BlueLED-transilluminators for every of your needs. New automatic 64 bit ChemoStar image acquisition software for use with Windows 10.

Blue/Green Transilluminator

UV Transilluminator

Thermo Printer

Optional additional equipment

- Conversion screen from UV to Blue- or White
- Blue- or Blue/Green LED transilluminator
- UV-transilluminator 20x20 cm 312 nm
- Thermo Printer
- White light led screen
- Analysis software

- EPI LED Cube Blue 477nm
- EPI LED Cube Green 525nm
- EPI LED Cube Photo Green 550nm
- EPI LED Cube Red 632nm
- EPI LED Cube Photo Red 670nm
- EPI LED Cube NIR 740nm
- EPI LED Cube NIR 765nm

ChemoStar PLUS⁺

Advanced Sample Illumination Technology

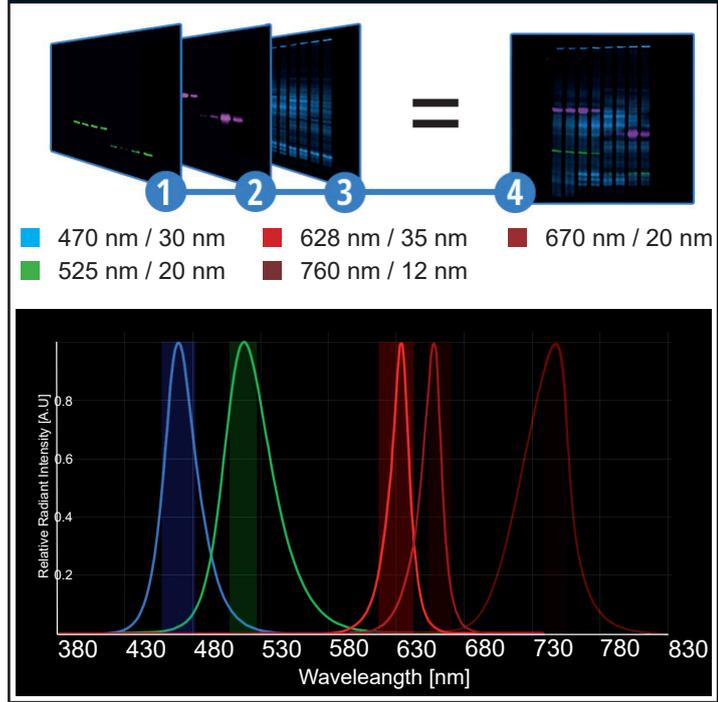

With the new Intas Advanced Sample Illumination Technology, you can take fluorescence imaging to a new level. Specially designed high-power LEDs with an extra wide exit angle allow sample sizes up to 30 x 25 cm to be evenly illuminated. Several LEDs with an extremely high total power output are available for each color channel. In addition, your sample will be excited as accurately as possible, using highly specific interference filters. In total, you have up to four color channels that can be used at the same time without adjustment or modification. This enables unprecedented results to be achieved - regardless of whether you use fluorescent western blotting, direct labelling, 2D DIGE or other fluorescent applications.

Comparison between LED Cubes & LED Spot lights

Intas LED Cubes	Competitors
<ul style="list-style-type: none"> 10 Pulsed LED's per channel 40 mm x 40 mm light aperture For large applications like 2D Dige Gels No reflection on target 	<ul style="list-style-type: none"> 1 Pulsed LED per spot 25 mm Light aperture Only for small applications Reflections on gels and glass

ChemoStar Touch 21.5"

Specifications

High-End camera with 6 or 9 MPixels. True 16 Bit scientific grade CCD sensor with 65.536 levels of grey for precisest quantification. Quantum efficiency 72% at 450 nm, optimized for chemiluminescence. Strong active cooling, ideal signal-to-noise ratio. Extremely fast lens F0.95 / 25 mm. Automatic lens control available. Image acquisition software optimized for touchscreen. User-friendly workflow with automated image capturing.

Includes the following features

- Touchpanel computer with 21,5" und Windows 10
- 4 USB ports and 1 x network port
- Auto-exposure, image sequences etc.
- 480mm x 440mm x 670mm (LxWxH)

Configure your own wavelengths

Pulsed High Power LED Cubes

Solid Metal Body

With the new Intas **GEL STICK Touch** you will acquire images of your samples in mere seconds with an unprecedented quality. The motorized autofocus will present pin sharp images in less than a second. To achieve this we developed a completely new imaging platform with its own algorithms and a camera module of the newest generation. The intuitive image acquisition software was specifically designed for the use with touch-screens but will still give you the functionality of a common desktop system. Also included are a consumables order menu, network save path configuration and an image viewer to manage your recorded images. All crucial adjustments for the image acquisition can be carried out both automatically and manually, including exposure time, focus, light source and zoom.

Specifications

- Scientific Grade Camera 5 MPixels
- 12 Bit source signal / 4096 grayscales
- 16 Bit data saving / 65536 grayscales
- 15.6 or 21.5 inch touchpanel, PC not necessary!
- Touchscreen usable with gloves
- Save your files on USB flash drive, local HDD or network devices
- Ultra-high-speed motorized zoom lens
- Pin sharp in each zoom step
- One Click Imaging
- Predefined zoom steps
- Automated exposure time
- UV filter (Eth-Bromid, GelRed, HDGreen etc.)
- User friendly touchscreen solution
- Intelligent darkbox
- UV- or Blue/Green LED Transilluminator
- Band excision mode
- Epi-white light
- Epi-blue LED cube optional
- Connections: 4 x USB, 1 x network

Blue/Green Transilluminator

Intelligent Door Security System

UV-Transilluminator 312nm

Solid Metal Body

Everything that you love is combined in the new **GEL JET**. Automated, compact, powerful and still flexible. A sturdy and modular construction and also a great design. The intelligent new image acquisition software will control the sensitive cameras with 5 megapixel. Includes a fully extendable drawer for UV- or Blue-Green LED transilluminators.

Specifications:

- Scientific Grade Camera 5 MPixels
- 12 Bit source signal / 4096 grayscales
- 16 Bit data saving / 65536 grayscales
- Ultra-high-speed motorized zoom lens
- Pin sharp in each zoom step
- One Click Imaging
- Predefined zoom steps
- Automated exposure time
- UV filter (Eth-Bromid, GelRed, HDGreen etc.)
- Intelligent darkbox
- UV-Transilluminator
- Band excision mode
- Epi-white light

Optional additional equipment

- Computer with Windows 10
- Screen 19" or 24"
- Digital thermal videoprinter
- White light LED screen
- Blue- or Blue/Green LED transilluminator
- Analysis-Software
- Blue/Green LED Transilluminator
- Epi-blue LED cube optional

Blue/Green Transilluminator

UV Transilluminator

Filter size: 20 x 20 cm or 21 X 26 cm

Thermo Printer

Blue- & Blue/Green- Transilluminator

• No DNA damage due to illumination • No “invisible” source of hazard • Long life span of LED light source

NEW

Mitsubishi K65 HM

Paper for thermal printers

Intas HDGreen +

- High sensitivity
- Safe alternative to ethidium bromide
- Non toxic - non mutagenic
- Easy to use
- Compatible with:
 - UV transilluminator
 - BLUE transilluminator
 - Blue/Green transilluminator

Blue LED Screen

Mini transilluminator

Gel Hood

Basic gel documentation

Blue Transilluminator

Blue/Green Transilluminator

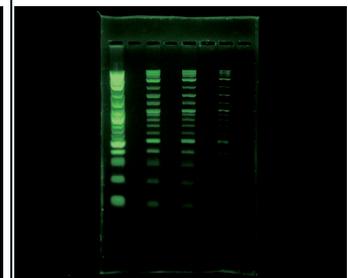

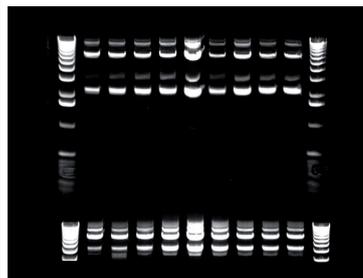

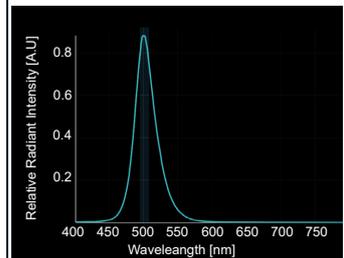

The revolutionary new Intas Blue illuminator is equipped with a newly developed light source that enables you to visualize fluorescent dyes like HD-Green and Gel-Red without the use of UV light. This way DNA damage can be avoided when cutting out bands while still being able to choose freely from all commercially available DNA dyes. The Blue illuminator will work perfectly with green fluorescent dyes like Intas HDGreen.

- Illumination area: 15 x 19 cm
- Blue light for DNA

Intas new Blue/Green illuminator series guarantees an ultra-strong sensitivity with most commonly available fluorophores that can be excited between 490 and 515 nm, like Intas HDGreen Plus. No DNA damage will occur using this device. Cutting out bands was never so easy with the built-in amber screen. Extremely high homogeneity of illumination is achieved over the complete working area.

- Illumination area: 16 x 20 cm
- Cyan light for DNA

All transilluminators can be integrated into our imaging systems!

NEW

PLANT IMAGER!

MADE IN GERMANY

The brand new Intas **PhytoJet Imager** is the perfect optical imaging system for the in vivo analysis of plants. This highly modular and easy to use whole plant imager brings you the perfect instrument for scientific research and stunning optical results. With its super-high-resolution RGB cameras you can acquire brilliant plant phenotyping images in two planes, while also having the choice of integrating fluorescence imaging capabilities for a variety of fluorophores, like GFP and YFP.

Specifications:

- Color Top Camera 5 MPixels
- Color Side Camera 5 MPixels
- 12 Bit source signal / 4096 grayscales
- 16 Bit data saving / 65536 grayscales
- 15.6 inch touchpanel, PC not necessary!
- Touchscreen usable with gloves
- Save your files on USB flash drive, local HDD or network devices
- Ultra-high-speed motorized zoom lens
- Pin sharp in each zoom step
- One Click Imaging
- Predefined zoom steps
- Automated exposure time
- User friendly touchscreen solution
- Connections: 4 x USB, 1 x network
